SRY4U

EMOTIONAL BASS // NOSTALGIA // RELEASE

ELECTRONIC PRESS KIT / 2026

BUILT ON CONTRAST.

SRY4U is a Denver-based electronic artist blurring the line between emotional melodic bass and destructive dubstep. Built around contrast, his music pairs melodic moments rooted in nostalgia with heavy, chaotic drops designed for release - turning bass music into something meant to be felt as much as heard.

In a short time, SRY4U has built a rapidly growing community through original music, remixes, and high-energy live performances. His releases and flips have accumulated hundreds of thousands of plays, with support from artists including Levity, Gorilla T, and ProbCause. Onstage, he has supported Hamdi, Sullivan King, Hostage Situation, Stoned Level, and Midnight T.

ATONEMENT

At the center of the project is Atonement - SRY4U's evolving live and visual world centered around release, confession, and the parts of ourselves we usually keep hidden. Nostalgic melodies create moments that feel familiar, while the heavier side turns those emotions into chaos and release.

THIS ISN'T ABOUT ESCAPING WHAT YOU FEEL.
IT'S ABOUT TURNING IT UP.
